

"Hello World!" in C

Objective

In this challenge, we will learn some basic concepts of C that will get you started with the language. You will need to use the same syntax to read input and write output in many C challenges.

Task

This challenge requires you to print ***Hello, World!*** on a single line, and then print the already provided input string to `stdout`.

Note: You do not need to read any input in this challenge.

Input Format

You do not need to read any input in this challenge.

Output Format

Print ***Hello, World!*** on the first line, and the string from the given input on the second line.

Sample Input 0

```
Welcome to C programming.
```

Sample Output 0

```
Hello, World!  
Welcome to C programming.
```
